

KODAH INC.

**FIRST SITTING MEETING ON 2<sup>ND</sup> FEBRUARY, 2018.**

VENUE: VODAFONE CAFE

Albert and Kofi are going to work on getting the approval of the SRC transport chairman to convince drivers to include the app on their phones by 5<sup>th</sup> February 2017.

David, CEO said he will make the prototype ready by Sunday, the 4<sup>th</sup> of February, 2017

Our meeting days will be on MONDAYS: 2PM-4PM

FRIDAYS: 9AM-11AM

Our CEO stated that by Friday which is the 9<sup>th</sup> of February, 2018 the divisions for the project will be out and serious work begins then.

He further stated that we'll have weekly targets for which we must meet in order for us to finish the project before presentation time is due.

**HOW THE APP WILL WORK? /FEATURES OF THE APP**

Secret codes will be given to drivers in order to prevent a situation where students mischievously decide to log into the driver side of the app.

Our app will first have a splash page, this will include our symbol and the name of our app...This page will load for some few seconds to enable background processes load.

Then a log in page follows to enable students or drivers who have not created accounts first create one with their user names and passwords otherwise click log in.

Details of the students and the drivers will be stored in a database.

When the user logs in per the option he/she selects he/she is either sent to the driver interface or the student interface.

Below is a flow chart on how the app will work:
